

RDs In Practice: Advancing Practice in Pediatric Nutrition
Supporting the Pediatric Intensive Care Patient

Round Table:

Medication Management- Grace J. Lee, PHARM. D., BCPS

Program Objectives:

Upon completion of this round table, participants should be able to:

1. Recognize common ICU medications that can cause electrolyte disturbances and how to adjust for them in the TPN
2. Explain the controversy surrounding early enteral feeding in an ICU patient on vasopressors
3. List patient risk factors to consider when deciding whether early enteral feeding is appropriate
