

OUR PROGRAM

Going back to school after a hospital stay can feel hard.

The Return to School (RTS) Program helps students get back to school quickly and safely with the support they need.

**ONE PROGRAM.
TWO SPECIALIZED TEAMS.**

How Can We Help?
Medical Hospitalizations

school@choc.org

Mental Health Hospitalizations

schoolreintegration@choc.org

Helping students return to school safely,
quickly, and confidently.

RETURN TO SCHOOL
PROGRAM

The Return to School (RTS) Program helps students get back to school after:

- ✓ Hospital stay
- ✓ Surgery or injury
- ✓ Chronic medical conditions
- ✓ Mental health crisis care

We connect families, schools, and healthcare teams to make the return to school easier.

HOW DOES SUPPORT WORK?

Our RTS team partners with each family to determine level of support needed. Here are some ways we help.

At **Tier 1: Universal Support**, we:

- ✓ Communicate with schools
- ✓ Help with paperwork
- ✓ Help students and families feel ready to go back to school

At **Tier 2: Supplemental Support**, we:

- ✓ Walk families through the process of returning to school
- ✓ Help schools, families, and healthcare teams talk to each other
- ✓ Set up support at school

At **Tier 3: Intensive Support**, we:

- ✓ Bring together schools, caregivers, and healthcare teams
- ✓ Make a custom plan for each student's return to school
- ✓ Continue support after student returns to school

HOW DO FAMILIES GET SUPPORT?

Talk with their healthcare team or contact the RTS Program.

- ✓ School forms
- ✓ School accommodations and classroom support
- ✓ School and emotional readiness
- ✓ School and community resources
